X. Instructions and Explanations for filling-up the.. Tables.	122—125

FOREWORD

This issue of State Annual Season and Crop Report for the Agricultural year 2001-02 attempts to serve as ready compendium of Agricultural conditions of Himachal Pradesh State with Statistical data on important variables such as land use profile, crop-wise irrigated and un-irrigated area, sourcewise net gross irrigated area, cropping pattern, production crop-wise, season-wise rainfall data, farm harvest prices. This report also includes Livestock & Agricultural Census Data.

I would like to place on record my appreciation for the collective team work done by the Deputy Commissioners, Sub-Divisional Officers (Civil), District Revenue Officers, Tehsildars, Naib-Tehsildars, Field Kanungos and Patwaris and Revenue functionaries whose in-puts have gone into bringing this report in present shape. I also record my kudos for the Statistical Assistants of this department posted in the Deputy Commissioners offices, associated with this work and have taken responsibility for preparing the district report.

At the State Headquarters the report has been compiled by Arvind Kashyap, Assistant Research Officer by taking the assistance of all the ARO's and Statistical Assistant working in the Statistical Cell of this office under guidance of Shri Mohan Singh & Shri O. P. Baniyal Research Officers.

I hope this publication would prove of immense help to Government offices, Research Workers & Planners alike, related with agricultural activities.

Sd/-
*Director of Land Records,
Himachal, Pradesh, Shimla-9.*

INTRODUCTION

The Annual Season and Crop Report is an annual publication of State Government attempting to reflect the land-use pattern, district-wise, as well as corresponding data on production structure of agricultural viz. land classification, month-wise and season-wise Rainfall data, Source-wise net irrigated area, crop-wise gross irrigated area, farm-harvest prices, agricultural wages. This report also incorporates data on quinquennial Live Stock Census—1997 and holdings-wise agrarian structure as observed during Agricultural Census 1995-96.

This report presents all the Statistical data in metric unit i.e. area in hectares and production in metric tonnes.

Physical Features :

Himachal Pradesh with its attractive valleys, snow-covered peaks, various varieties of flora & fauna, lakes and rivers, temples and monasteries and its simple living in habitants rearing flock and growing horticultural crops offers a captivating panorama for the tourists. Besides, its undulating undulating terrain varying within altitudes from 350 metres to 6975 metres above the mean sea-level is situated in the lap of Himalayan ranges in the North-West of India. Geographically, it is bordered by State of Haryana in the South, Uttar Pradesh in the South East and Jammu & Kashmir in North, Punjab in the West & South West and Tibet in the east, it is situated between 30°-22'-40" to the 33°-12'-40" North latitude and 75°-47'-5" to 79°-04'-22" East longitude.

The State came into existence as a part "C" State of the Indian Union on April 15, 1948 as a result of the merger of 30 Punjab and Shimla Hill princely States. At that time, the State had only four district viz. Chamba, Mahasu, Mandi and Sirmaur with a total area of 27168 sq. kms. in 1954, the neighbouring 31st State of Bilaspur was integrated with Himachal Pradesh thereby one more district was added to its territory raising the total geographical area of the State to 28237 sq. kms. Further, in May, 1960 a new border district of Kinnaur made out of Mahasu district on account of administrative reasons. With the reorganization of State on November 1, 1966, four more district namely Kangra, Kullu, Lahaul-Spiti and Shimla of Punjab were integrated with Pradesh thereby increasing the geographical area virtually doubled. On January 25, 1971, this Pradesh attained the status of full Statehood. On 1st September, 1972 two more districts of Una and Hamirpur were carved out of Kangra district and then district Mahasu was reorganized in the form of new districts of Shimla & Solan.

Thus at present, the State of Himachal Pradesh is spread over an area of 55673Sq. Km. as per the Survey General of India comprises of 12 districts namely Bilaspur, Chamba, Hamirpur, Kangra, Kinnaur, Kullu, Lahaul and Spiti, Mandi, Shimla, Sirmaur, Solan and Una. The State Headquarter located at Shimla which has unique existence on the National as well as inter-national map due to its scenic beauty and historicity.

CLIMATIC AND AGRO-CLIMATIC ZONES :

Location of Himachal Pradesh, as its name suggests, lies in the Himalayan ranges. The terrain varies as one moves from South to North and from West to East. Due to its varying altitudes, the climate also varies from mild to cold. Another factor which also changes the climate from place to place is that the five major rivers flow through this State viz. Beas in Kullu, Mandi and Kangra, Satluj in Kinnaur, Shimla and Bilaspur, the river Ravi is passing through Chamba and the river Yamuna having its major tributaries in District Shimla and Sirmaur. The fifth river Chinab flows through the District of Lahaul-Spiti and some parts of Chamba district.

All these factors and geographical locations of the State provide suitable climate and varying agro-climate zones for growing horticultural and off-season vegetables which will certainly change the economic standards of rural people in the times to come.

The area of the State can be geographically divided into the following five categories of Zones:—

- (i) *Valleys upto an elevation of 1000 metres.*—These are fertile and can be subjected to intensive cultivation.
- (ii) *Low Hills.*—They have an altitude of 1000 metres to 2000 metres above the mean sea level and these lands are suitable for horticulture crops.
- (iii) *High Hills.*—These area lies between 2000 metres and 3500 metres above the mean sea level and are sparsely populated. They are good for raising forests.
- (iv) *Alpine Zones.*—Above 3500 metres. These zones are good for grazing.
- (v) *The Land of Snows.*—Without vegetation.

Precipitation and its Spread :

Land use Profile (Table-II) is preceded by detailed season-wise information or rainfall statistics for the year 2001-2002. It is a fact that precipitation is most important input not only for the germination of crops seeds but also for its subsequent growth and maturity. The quantum of rainfall and proper distribution are the most crucial variables for a State like Himachal Pradesh where the development of irrigation infrastructure is severely restricted by its topography. The extent of assured area irrigated during the year under review is 18.9 per cent of the total cropped area rain fed and 81.1 per cent area is still un-irrigated. The following considerations are also important while talking about the concept of assured irrigation:—

1. The dominant share of net irrigated area is attributable to the common source of irrigation viz. Kuhls, which is nearly 79.2%. These Kuhls are water channels led from the source of water to the fields.
2. The production of crops depends upon the quantum of timely rainfall and its proper distribution during the crop seasons. The distribution of rainfall is indicated by the number of rainy days shown against each district in Table-1 of the Report.

Classification of area under land utilization :

Land use classification is the systematic arrangement of various types of available land on the basis of certain defined characteristics mainly to identify and understand their fundamental utility. Thus, land must be carefully preserved & utilized so that it may fulfil our multifarious requirements. The Table-II (Detailed Tables) of this report reveals the district-wise land use profile of the State. The total geographical area of the State according to Surveyor General of India is 55,67,300 hectares or 55,673 sq. kms.. In comparison to this geographical area, the total cadastrally surveyed area by village papers in the State during the year under review comes to 45,42,759 hectares revealing thereby that 10,24,541 hectares of area is unsurveyed and is not appearing in revenue records. The magnitude of such area in the aforesaid year was 18.4 per cent of the total geographical area, a major part of which falls into the Districts of Kinnaur and Kullu. The accompanying Table-I depicts the break-up of the reporting area during the year 2001-2002 vis-a-vis the preceding year 2000-2001.

TABLE-I—CLASSIFICATION OF REPORTING AREA
2000-2001 AND 2001-2002

Sl. No.	Category	2000-2001		2001-2002	
		Area	%	Area	%
1	2	3	4	5	6
1.	Forests	1093545	24.0	1098661	24.2
2.	Barren & Unculturable Land.	802717	17.8	806574	17.8
3.	Land put to non-agri-agricultural uses.	313729	6.9	317469	7.0
4.	Permanent pastures and other grazing lands.	1529243	33.6	1518688	33.4
5.	Land under Misc. crops and groves not included in area sown.	56834	1.2	60230	1.3
6.	Culturable waste	124458	2.7	122114	2.7
7.	Other fallow land	13497	0.4	13093	0.3
8.	Current fallow land	54165	1.2	56287	1.2
9.	Net area sown	554592	12.2	549643	12.1
10.	Total reporting area by village papers (1 to 9).	4547280		4542759	10.0
11.	Total cropped area	947542	20.8	955740	21.0
12.	Area sown more than once.	392950	8.6	406097	8.9

I. Forests :

All actually forested area on lands classed or administered as forests, covered by any legal enactment dealing with forests, whether State

owned or private and whether wooded or maintained as potential forest land, comes under the category of "Forests".

If any portion of private forests land is not actually wooded but is put to some agricultural uses then that portion of land shall be included under the appropriate heading of cultivated or uncultivated land. However, this will not apply to the State owned forests.

A glance at Table-I shows that the area under this category has increased this time to 5116 hectares as compared to last year. Area under forest is 10,98,661 hectares during the year 2001-2002 as against 10,93,545 during the year 2000-2001. This accounts for 24.2% of the total area.

II. Barren and unculturable :

This category of land-use classification includes all barren and unculturable lands like mountains, deserts, etc., which cannot be brought under cultivation except at an exorbitant cost. These lands can lie in isolated blocks or may lie within cultivable holdings.

This account for only 17.8 per cent of the total reporting area during the year under report and reasons for this decrease in the area is due to settlement operations and actual figures are now taking their own shapes. In absolute terms it is 806574 hectares.

III. Land put to non- Agriculture uses :

As the names suggests, this category includes all lands which are put to uses other than agricultural viz. lands occupied by buildings, roads, railways, rivers and canal etc.

During the year under review, the total area under this category accounts for 7.0% per cent of the total reported area. In absolute terms, the total area under the category is 3,17,469 hectares during 2001-2002 as against 3,13,729 hectares for 2000-2001.

IV. Permanent Pastures and other Grazing Lands :

This includes all grazing lands whether they are permanent pastures or not. The village common grazing lands are included under this head. The land under this category forms the largest chunk of the reporting area and is 33.4 per cent. In absolute terms such area is to the extent of 15,18,688 hectares during 2001-2002 as against 15,29,243 hectares during the 2000-2001.

V. Land under Misc. Tree crops and Groves not included in net Area Sown :

This includes all such lands which is not included in Net Area Sown but it is put to some agricultural uses. It includes the land under misc. trees etc. i.e. land under casurina tree, thatching grasses, bamboo bushes and other groves for fodder/fuel purposes. The area under this head is 60230 hectares which is only 1.3% of the reporting area during the year under review.

VI. Net Area Sown :

This represents the net area sown under crops counting area sown more than once only once in the same year.

The net area sown during the year 2001-02 was 549643 hectares as against 554592 hectares during the year 2000-01. It constituted 12.1 per cent of the reporting area during the year under report.

VII. Total Cropped Area :

It is sum total of all areas sown under all crops during the year under review treating "areas sown more than once" separately for each crop. This area during the year 2000-2001 was 955540 hectares as against 947542 hectares during the year 2000-2001.

VIII. Culturable Waste Lands :

This comprises of all lands available for cultivation whether taken up for cultivation or abandoned after a few years for one reason or the other. Such lands may be either fallow or covered with shrubs or jungles, which are not put to any use. They may be assessed or unassessed and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for five years or more in succession shall be included under this head. The land under this category forms 2.7% of the total reporting area. The area during the year under report was 122114 as against 124458 in the year 2000-2001.

IX. Other Fallow Lands :

This includes all lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year or not more than five years. The reason for keeping such land fallow may be one of the following :—

- I. Poverty of cultivator.
- II. Inadequate supply of water
- III. Unfavourable weather conditions.
- IV. Silting of Canals and rivers.
- V. Unremunerative nature of farming.

Such lands are also classified as "Banjar Jadid" in the parlance of the Revenue Department. The extent of such lands during the year 2001-2002 is only 0.3 per cent of the total reporting area.

X. Current Fallows :

This represents cropped areas which are kept fallow during the current year. For example if any seeding area is not cropped again in the same year, it may be treated as current fallows. The land under this category also forms 1.2 per cent of the total reporting area for the year 2001-2002. There is increase of 2,122 hectares under this category of land as compared to the last year.

Intensity of cropping :

Intensity of cropping means the index of intensive cultivation and is expressed as a ratio of gross area sown to net area sown. It is conveniently expressed as percentage and is calculated as under :—

$$R = \frac{\text{Gross Cropped Area} \times 100}{\text{Net Area sown}}$$

Table-II depicts the said ratio district-wise for the year 2001-2002 and for the State it is 173.8 per cent. The district-wise position is also given hereunder :—

TABLE-II DISTRICT-WISE INTENSITY OF CROPPING FOR THE YEAR 2000-01 VIS-A-VIS 2001-2002

Sl. No.	Name of district	Year-2001-01			Year 2001-02		
		Net area sown	Total cropped area	Intensity	Net area sown	Total cropped area	Intensity
1	2	3	4	5	6	7	8
1.	Bilaspur	30212	57970	191.9	30366	57783	190.3
2.	Chamba	42675	62540	146.5	42535	68309	160.6
3.	Hamirpur	35965	68938	191.7	35382	70062	198.0
4.	Kangra	118046	217253	184.0	116595	222154	190.5
5.	Kinnaur	7586	9328	123.0	7580	9088	119.9
6.	Kullu	37185	66818	179.7	37092	61407	165.6
7.	Lahaul-Spiti	3487	3595	103.1	3296	3377	102.5
8.	Mandi	85793	157734	183.9	87307	156462	179.2
9.	Shimla	72554	94034	129.6	69273	97399	140.6
10.	Sirmaur	42088	76728	182.3	41447	76568	184.7
11.	Solan	39007	63698	163.3	38276	64054	167.4
12.	Una	39994	68906	172.3	40503	68877	170.1
Total		554592	947542	170.9	549643	955540	173.8

TABLE-III CROPPING INTENSITY DURING THE LAST FIVE YEARS

Sl. No.	Name of District	Intensity of Cropping				
		Year 1997-98	Year 1998-99	Year 1999-2000	Year 2000-2001	Year 2001-2002
1	2	3	4	5	6	7
1.	Bilaspur	192.8	188.9	190.6	191.9	190.3
2.	Chamba	156.5	168.2	152.1	146.5	160.6
3.	Hamirpur	196.7	196.5	195.9	191.7	198.0

1	2	3	4	5	6	7
4.	Kangra	186.9	187.7	187.3	184.0	190.5
5.	Kinnaur	131.1	124.2	116.1	123.0	119.9
6.	Kullu	172.4	167.0	157.3	179.7	165.6
7.	Lahaul-Spiti	102.4	104.3	102.9	103.1	102.5
8.	Mandi	179.6	187.8	188.3	183.9	179.3
9.	Shimla	150.6	147.5	141.6	129.6	140.6
10.	Sirmaur	185.8	184.2	186.1	182.3	184.7
11.	Solan	166.5	165.0	163.1	163.3	167.4
12.	Una	186.7	179.7	176.2	172.3	170.1
H.P. State average		176.0	176.6	173.5	170.9	173.8

Table-II reveals that ratio of cropping intensity was highest in Hamirpur district *i. e.* 198.0% for the year 2001-2002. Similar trend can be seen in Table-III, during the last 5 years except for the year 2001-2002 and during this year Hamirpur district was at the top. The cropping intensity was lowest in tribal district of Lahaul-Spiti (102.5%) and Kinnaur district (119.9%). The logical conclusions emerge from Table-II and Table-III as follows :—

- Comparatively, the cropping intensity is greater in low lying areas as compared to higher altitude areas because low lying areas can be subjected to more intensive tillage cultivation.
- The ratio of cropping intensity is low in Tribal district of H. P. namely Lahaul-Spiti 102.5% and Kinnaur 123.0%. The reasons for low intensity can be attributed to these districts that these districts are single cropped zones and not viable for repeated cropping owing to mountainous and snow bound areas, mostly for 5 to 6 months. Besides, the intensity of cropping also being influenced by snow bound conditions and other factors, such as irrigation infrastructures, agro-climatic conditions and source of finance of the farmers at the time of sowing and harvesting season.

Irrigation Intensity:

The idea of irrigation intensity is analogous to cropping intensity and symbolizes as follows :—

$$R = \frac{\text{Gross Irrigated Area} \times 100}{\text{Net Area irrigated}}$$

The table-IV exhibits the ratio of irrigation intensity for the State as 177.2%. It can also be seen from the table that it is highest in District Kangra 198.3%, followed by District Mandi 195.3%, Solan 189.5%, Sirmaur 185.0%, Bilaspur 184.6%, Una 164.4, Shimla 162.9%, Hamirpur 152.6%, Chamba 127.3%, Kinnaur 120.9%, Kullu 111.15% & Lahaul-Spiti 102.5%.

The scope for the increase in irrigation intensity is limited due to hilly terrain of the State, but promising system such as conserving the water through watershed schemes, drip and sprinkler irrigation is being introduced by the Government so as to increase the extent of irrigation intensity. These new systems can be harnessed by the growers to improve the agricultural practice and individual economy.

TABLE—IV DISTRICT-WISE IRRIGATION INTENSITY FOR THE YEAR

Sl. No.	Name of District	Year 2000-01			Year 2001-02		
		Net irrigated area	Gross irrigated area	intensity %	Net irrigated area	Gross irrigated area	Inten-sity %
1	2	3	4	5	6	7	8
1.	Bilaspur	3164	5678	179.5	3164	5841	184.6
2.	Chamba	6595	7799	118.3	5569	7088	127.3
3.	Hamirpur	1718	3161	184.0	3150	4808	152.6
4.	Kangra	55183	64557	117.0	32194	63851	198.3
5.	Kinnaur	4452	5727	128.6	4530	5478	120.9
6.	Kullu	2510	2905	115.7	2510	2790	111.15
7.	Lahaul-Spiti	3487	3595	103.1	3296	3377	102.5
8.	Mandi	13309	25796	193.8	13106	25591	195.3
9.	Shimla	3023	5258	173.9	3148	5129	162.9
10.	Sirmaur	14697	26763	182.1	14264	26386	185.0
11.	Solan	9530	17764	186.4	9530	18056	189.5
12.	Uha	7838	12272	156.6	7645	12571	164.4
Total		125506	181275	144.4	102106	180966	177.2

Productivity of Crops :

Productivity or yield per unit hectare is one of the major indicator of production possibilities, two types of methods are currently practiced in determining the production per hectare of crops in the State.

(i) Random Sampling Method to estimates the yield per hectare in respect of five major crops viz. Maize, Paddy, Wheat, Barley and Potato is being applied in the State and Ginger crops has also been covered by the said method. The crop cutting experiments by random sampling method are being conducted jointly by the field staff of Revenue and of Agriculture Departments. The results of crop-cutting experiments so obtained are being used to estimates the yield rates and production thereof.

(ii) The productivity in respect of all remaining crops is being estimated on the basis of crop cutting experiments by traditional

method or Anawari method. These experiments at the field level are also being conducted jointly by the Department of Revenue & Agriculture. The yield/hectare in respect of five major crops for the year 2000-01 *vis-a-vis* 2001-2002 is tabulated in Table-V is as under :—

TABLE—V PRODUCTIVITY OF MAJOR CROPS

Sl. No.	Name of crops	Yield/ hectare in Kg. 2000-2001	Yield/ hectare in Kgs. 2001-2002
1.	Maize	2293.706	2549.757
2.	Paddy	1532.081	1705.384
3.	Wheat	692.951	1738.167
4.	Barley	835.034	1386.467
5.	Potato	13.686	7.802
6.	Ginger	2.299	1101.20

Cropping Pattern:

The Table-VI shows the crop-wise % distribution of total cropped area *i.e.* area sown under food and non-food crops. This table also indicates total output for the year 2001-2002 as against the preceding year 2000-2001. An analytical study of this table gives following results :—

- (i) As usual it shows that the economy of the State is Agricultural based and majority of the population is sustaining on the agricultural output 96.7% of the total area sown under all crops is covered by food crops and 3.3% by non-food crops. The food crops constitute 99.5 per cent & non-food about 0.5% of the total out-turn of the crops grown.
- (ii) Under food crops, it is the cereal crops *viz.* Wheat, Barley, Maize, Paddy and other Cereals which accounts for major share of area as well as production of the crops sown. The cereal crops contribute 82.3% of the total cropped area and 89.7 per cent to the total output. Keeping in mind the peculiar physical & Agro-climatic conditions of the State, the scope to bring more area under cultivation is severely limited and available land is exhaustively used for raising cereal crops for the purpose of self-subsistency of the rural masses.
- (iii) A look at pulses crops would reveal that area under these crops is just 3.1 per cent of the total cropped area with corresponding share 1.3 per cent in total production.
- (iv) The only shift in area, if any is clearly visible in respect of area under horticultural crops. The total area under fruit and vegetables during the year 2001-2002 aggregates 10.0 per cent

of total cropped area. The vegetables crops account for 60% of the total output. It is mentioned here that methodology for estimating production under fruit crops in the State is yet to be finalized and for this reason production statistics for such crops have not been included in the tabular data of Table-IV of the report.

- (v) The total output for the year 2001-2002 *i. e.* 17.67 lacs metric tonnes which is higher as compared to corresponding figures of 13.38 lacs metric tonnes for the year 2000-2001. The increase in the total cropped area in absolute terms and is due to better weather conditions at the time of sowing & harvesting.
- (vi) The present production estimates do not depict the output statistics of fruit and some vegetable crops & one has to concede the overall production estimates do not give actual position of crop production. However, this department is presently involved in implementing a Centrally Sponsored Scheme on fruit and vegetables so that a comprehensive survey on area and production of fruit and vegetable is completed at the earliest and such production and estimates are subsequently generated.
- (vii) Of late, the State is making a headway in augmenting area under the crops of Apple, Potatoes, Ginger, Peas, Hops, Kuth and Cabbage etc. Though the scope for increasing area under these crops is limited yet in view of their cash earning potential, it is hoped that these crops are bound to induce some welcome change in the economic position of peasantry class.

TABLE-VI PERCENTAGE OF DISTRIBUTION AREA AND OUTPUT FOR THE YEAR 2000-01 AND 2001-02

Sl. No.	Name of crops	2000-01			
		Area hectare	%	Output (MT)	%

FARM HARVEST PRICES :

The data appended in Table-VII given below provides a comparative position of farm harvest prices for the year 2001-2002 as against the preceding year 2000-2001. The Farm Harvest Prices indicate the wholesale prices/quintal of the produce at the farm site which is exclusive of transport and other cartage costs etc. It is defined as the average wholesale price at the village site during the specified harvest period and is arrived at on the basis of prevalent prices at the pre-selected centres.

TABLE—VII FARM HARVEST PRICES OF MAJOR CROPS FOR THE YEAR 2000-2001 AND 2001-2002

Sl. No.	Name of crops	(Prices in Rupees per quintal)	
		Year 2000-2001	Year 2001-2002
1.	Paddy	792	755
2.	Maize	559	798
3.	Wheat	715	710
4.	Barley	652	700
5.	Gram	2094	2020
6.	Groundnut	2000	2175
7.	Rapeseeds/Mustard	1894	1808

AGRICULTURAL WAGES:

The accompanying Table-VIII indicates the position of agricultural wages per day in respect of skilled and un-skilled workers for the year 2000-2001 and 2001-2002. The data appearing in the Table exhibits the position of the State, as a whole.

**TABLE VIII—AGRICULTURAL WAGES/DAYS FOR THE
YEAR 2000-2001 AND 2001-2002**

Sl. No.	Category of Labour	Year 2000-2001	Year 2001-2002
1.	Carpenter	121	130
2.	Blacksmith	113	122
3.	Cobblers	106	114
4.	Field labour	81	84
5.	Other agricultural labour	68	84
6.	Herdsman	68	67

The increase in daily wages of all categories of labour that is skilled or un-skilled was due to general price-rise and scarcity of labour.

SEASON AND CROP REPORT

EXPLANATORY NOTE

18.11. This should be a comprehensive report of the main agricultural features of the year and should explain and comment upon the figures given in the main tables. In this note all topics on which tables are given in the Report should be covered one by one and discussed with reference to the conditions prevailing in the year as compared to the conditions prevailing in the previous years. The heading and a brief outline of each item to be covered is given below:—

- I. **Introduction.**—(i) General characteristics of the year to which the Report relates,
 - (ii) the geographical area,
 - (iii) total number of villages,
 - (iv) extent of reporting and non-reporting areas, etc.
- II. **Rainfall.**—(i) One paragraph on each of the main rainfall seasons of the State,
 - (ii) rainfall and other weather conditions in the different regions of the State, their effects on the different agricultural operations—especially on the area sown, growth and yield of the crops,
 - (iii) any damage caused to the crops.
- III. **Classification of Area.**—(i) Utilization of land during the year, any marked departures from the normals and their causes.
- IV. **Irrigation.**—(i) Sources of Irrigation, any additions during the year,
 - (ii) area irrigated total, crop-wise and source-wise—any departures from normals,
 - (iii) proportion of irrigated area to total sown area.
- V. **Crop acreages.**—(i) Total area sown as compared with normal,
 - (ii) total area under different crops, their comparison with normals,
 - (iii) any other changes in crop acreages,
 - (iv) any increase in area sown due to new reclamations or use of improved methods of classification.
- VI. **Yield per hectare of crops.**—(i) The normal yields,
 - (ii) the condition factor,

- (iii) causes affecting favourably or adversely on the yields of different crops,
 - (iv) any increase in yield per hectare due to use of improved seeds or fertilizers.
- VII. Total out-turn of crops.—**(i) The total production of different crops compared to normals, causes for significant departures.
- VIII. Farm prices.—**(i) Important change in the farm prices due to:
- (a) Change in the total out-turn of the crop,
 - (b) Change in the general price level,
- (ii) general comments on the level of agricultural prices.
- (iii) value of agricultural produce.
- IX. Agricultural wages.—**(i) The general trend of agricultural wages during the year,
- (ii) scarcity or abundance of labour,
- (iii) number of working hours.
- X. Livestock, Poultry, Agricultural Machinery and Implements.—**
- (i) Diseases affecting livestock and poultry and their mortality during the year,
 - (ii) steps taken to check the livestock diseases,
 - (iii) any development work done in this direction.
- XI. Conclusions.—**(i) General condition of the agriculturist during the year,
- (ii) any legislative measures taken to ameliorate the condition of agriculturist or agricultural labour,
- (iii) any remission in land revenue or other concessions,
- (iv) any other important point.

The explanations regarding the tables that follow are given towards the end of the Report.

This Report may be supplemented by necessary graphs, charts, diagrams and maps representing the main statistics given in the Tables.

SUMMARY TABLES—contd.

F—Farm Prices of Principal Crops

Crops	1997-98	1998-99	1999-2k	2000-01	2001-02

TABLE No. VIII

Number of Livestock, Poultry, Agricultural Machinery and Implement
in each District of Himachal Pradesh according to last census as on

Sub-Schedule I—Livestock (Cross Bred Cattle) :

Male over 2½ Yrs.	1. Used for breeding only	8,037
	2. Used for work only	84,408
	3. Used both for work and breeding	14,005
	4. Used for neither breeding nor work	2,033
	5. Total Male over 2½ years	1,08,483
Female over 2½ Yrs.	6. In Milk	1,75,180
	7. Dry	55,020
	8. Not yet calved	9,498
	9. Others	5,818
	10. Total Female over 2½ Yrs.	2,45,516
Young Stock Under 1 Yr.	11. Male	23,452
	12. Female	74,021
	13. Total	97,473
1 to 2½ Yrs.	14. Male	24,679
	15. Female	62,251
	16. Total	86,930
Total Male Cross Bred	17.	1,56,614
Total Female Cross Bred	18.	3,81,788
Total Cross Bred Cattle	19.	5,38,402
Indigenous Cattle Male over 3 Yrs.	20. Used for breeding only	50,794
	21. Used for work only	4,77,549
	22. Used both for work and breeding	77,389
	23. Used for neither work nor breeding	8,494
	24. Total male over 3 years	6,14,226
Female over 3 years	25. In Milk	2,88,693
	26. Dry	1,20,404
	27. Not yet calved	25,619
	28. Others	14,272
	29. Total Female	4,48,988
Young Stock under 1 Yr.	30. Male	64,217
	31. Female	1,25,971
	32. Total	1,90,188
1 to 3 Yrs.	33. Male	94,196
	34. Female	1,15,826
	35. Total	2,10,022
Total Male	36.	7,72,639
Total Female	37.	8,026
Total Indigenous Cattle	38.	14,71,452
Total Cattle (Cross Bred & Indigenous).	39. Stray cattle	20,09,854
B—Buffaloes :		
Male over 3 years	40. Used for breeding only	4,633
	41. Used for work only	2,136
	42. Used both for work and breeding	1,284
	43. Used for neither breeding nor work	318
	44. Total male	8,371
Female over 3 years	45. In Milk	3,02,299
	46. Dry	1,02,096
	47. Not yet calved	14,911
	48. Others	5,796
	49. Total Female	4,25,102

TABLE VIII—contd.

Young Stock under 1 year	50. Male	2,12,080
	51. Female	84,785
	52. Total	1,06,065
1 to 3 years	53. Male	14,169
	54. Female	98,666
	55. Total	1,12,835
	56. Total Buffaloes (Male and Female)	6,52,373
C—Yaks:		
Over 3 years	57. Male	1,134
	58. Female	694
	59. Total	1,828
Upto 3 years	60. Male	390
	61. Female	330
	62. Total	720
Total (Male+Female)	63.	2,548
D—Mithuns:		
Over 3 years	64. Male	251
	65. Female	374
	66. Total	625
Upto 3 years	67. Male	50
	68. Female	56
	69. Total	106
Total Mithuns (Male & Female).	70.	731
Total Bovines	71. (A+B+C+D)	26,65,506
E—Sheep (Cross Bred):		
1 year and over	72. Male	36,896
	73. Female	58,378
	74. Total	95,274
Under 1 year	75. Male	23,524
	76. Female	25,391
	77. Total	48,915
	78. Total Cross Bred	1,44,189
Sheep (Indigenous):		
1 year and over	79. Male	1,53,669
	80. Female	1,38,117
	81. Total	2,91,786
Under 1 year	82. Male	86,951
	83. Female	3,85,905
	84. Total	4,72,856
	85. Total (Indigenous)	7,64,642
	86. Total Sheep (Cross Bred and Indigenous).	9,08,831
F—Goats:		
1 year and above	87. Male	1,72,588
	88. Female	2,56,337
	89. Total	4,28,925
Under 1 year	90. Male	1,10,391
	91. Female	1,74,432
	92. Total	2,84,823
	92-A. Dry	2,32,781
	93. Total Goats	9,46,529
G—Horses and Ponies:		
3 years and over	94. Male	9,325
	95. Female	6,690
	96. Total	16,015
Under 3 years	97. Male	3,378
	98. Female	2,633
	99. Total	6,011
	100. Total Horses and Ponies	22,026

TABLE VIII—contd.

H—Mules :			
3 years and over	101. Male		19,764
Under 3 years	102. Female		4,640
	103. Total		24,404
I—Donkeys :			
	104. Male		3,363
	105. Female		3,276
	106. Total		6,639
Camel 4 years Under	107. Male		49
	108. Female		17
	109. Total		66
J—Camel :			
Upto 4 years	110. Male		70
	111. Female		32
	112. Total		102
	113. Total Camel		168
K—Pigs (Cross Bred/Exotic) :			
6 months and above	114. Male		256
	115. Female		265
	116. Total		521
Below 6 months	117. Male		141
	118. Female		202
	119. Total		343
	120. Total (Cross Bred/Exotic)		864
6 Months and above Indigenous :			
	121. Male		971
	122. Female		1,263
	123. Total		2,234
Below 6 months	124. Male		506
	125. Female		1,066
	126. Total		1,572
	127. Total Indigenous		3,806
	128. Total (Indigenous and cross bred)		4,670
L—Dogs :			
Domestic	129. Male		89,430
	130. Female		33,451
	131. Others		1,22,881
Others	132. Male		24,740
	133. Female		22,526
	134. Others		47,266
	135. Total Dogs		1,70,147
Sub-Schedule No. II—Poultry :			
Fowls :			
Cocks			
	1. Desi		59,750
	2. Improved		43,355
	3. Total		1,03,105
Hens			
	4. Desi		89,975
	5. Improved		59,924
	6. Total		1,49,899
Chicken (Below 5 months)			
	7. For Eggs		31,028
	8. For Meat		29,869
Desi	9. For Eggs		26,852
Improved	10. For Meat		40,897
	11. Total		1,28,646
	12. Total Fowls		3,81,850
Drakes			
	13. Desi		953
	14. Improved		83
	15. Total		1,036

TABLE VIII—contd.

Ducks	16. Desi		146
	17. Improved		460
	18. Total		606
Duckling (below 6 months)	19. Desi		10
	20. Improved		10
	Total		20
	21. Grand Total		1,662
Others i.e. Turkeys, Quails and Guinea fowls etc.			
A. Sub-Schedule No. III—Agricultural Implements and Machinery :			
Hand Operated Implements			
	1. Seed-cum-fertilizer drill		1,918
	2. Seed drill		2,479
	3. Chaff Cutter		99,141
	4. Wheel Hoe		12,23,554
	5. Sprayer and Duster		63,874
	6. Rice Planter		617
	7. Thresher		7,442
Animal Operated Implements			
	8. Wooden Ploughs		3,06,185
	9. Soil stirring Steel Ploughs		1,25,319
	10. Soil turning Steel Ploughs		30,935
	11. Triphali (Cultivator)		37,113
	12. Disc harrow		1,16,631
	13. Seed-cum-fertilizer drill		525
	14. Levelling karah (leveller)		1,75,791
	15. Wet land puddler		65,867
	16. Olpad animal operated thresher		—
	17. Animal Cart		1,807
	18. Sugarcane crusher		616
	19. Ghanis		668
	20. Persian wheel		—
	21. Seed Drill		3,315
Plant protection Equipment, Engine etc.			
	22. Power operated sprayer/duster		2,173
	23. Diesel Engine Pump set		1,295
	24. Electric Pump set		2,530
C—Tractor and other power operated implements :			
	25. Agricultural power tiller		526
	26. Agricultural Tractors		3,679
	27. Mould board plough		2,602
	28. Disc harrow		3,351
	29. Seed-cum-fertilizer drill		374
	30. Planter		188
	31. Leveller		1,803
	32. Potato diggers		10,282
Combine harvester			
	33. Trailer		390
	34. Tractor operated		332
	35. Self propelled		47
Power Operated Thresher			
	36. Paddy		875
	37. Wheat		7,196
