INTRODUCTION

One of the salient features of Department's mandate is to protect and conserve reservoir and lacustrine fisheries resources of the state. In pursuit of the same Department of Fisheries, Himachal Pradesh has been regularly stocking various ecologically and economically important fishes in water bodies of the state as a pay back effort towards mother nature. Along with periodic stocking, conservation measures are also an integral part of department's management strategy of various resources. All rivers, their tributaries, small streams, ponds, reservoirs are stocked with fish seed from departmental farms and even outside the state to maintain fish population in the state water bodies. As per Fisheries Act 1976, fishing in religious waters of Himachal Pradesh is banned completely. Here are few activities undertaken recently to achieve the goal of sustainable growth in fisheries:-

Fish Seed

Carp Fingerlings for Stocking

Trout Fingerlings

Fish Seed Packing

Packed Fish Seed

Fish Stocking in Rewalsar (Dated : March 21, 2014)

Sampling of Fish

Collection of stock

Collection of Stock

Stocking in River

Trout Fish Stocking in Sangla Rivers (Dated : July 07, 2014)
