Himachal Fisheries Department launched its website during the year 2004 in collaboration with National Informatics Centre, Shimla. During the year 2014, website was developed and designed at home with using latest IT tools, content management system which disseminate adequate knowledge on fisheries development in the state, starting from its beautiful fisheries resources, their optimum exploitation for sustained yield, sport fishery, tips on rainbow trout farming as well as carp aquaculture. It has covered aspects including post-harvest management practices. The website is being updated by its departmental officials regularly who are working efficiently to transmit the knowledge on latest technological advancements and information of public use, for the netizens.

I hope this website will merit worthy to the expectations of its viewers and we invite suggestions for its improvement also.

(Satpal Mehta)

Director-cum-Warden of Fisheries,
Himachal Pradesh
