

P R E F A C E

This issue of the State Season and Crop Report for the agricultural year 1980-81 attempts to highlight the basic agricultural statistics of Himachal Pradesh, and contains detailed information on rainfall, land utilisation, area irrigated by different sources, cropping pattern, the productivity and production of all major crops, the farm harvest prices, agricultural wages and livestock census data, etc. The salient feature of this report is its write-up which has been completely changed up in comparison to the preceding years, to make it analytically more useful. The report contains data for the district and for the State as a whole.

I would like to place on record my feeling of satisfaction of the work done by the Deputy Commissioners, Sub-Divisional Officers (Civil), Tehsildars, Naib-Tehsildars, Kanungos, Patwaris and other officials associated with this work. My appreciation is also due to the Statistical Assistants posted in the Deputy Commissioner's offices who are directly associated with this work and have taken the burden for the preparation of district reports in time. Special mention may be made of the valuable guidance made by Shri R. L. Seth, Joint Director of Land Records.

At headquarter the report was compiled by Shri R. R. Gupta, Statistical Assistant and was scrutinised by Shri A. R. Verma, Superintendent, who has been associated with this work since long. The presentation of report in more analytical form is owing to the painstaking efforts of Shri Birpal Singh, Director of Agricultural Census, who has been made incharge of Statistical Cell in this Directorate recently.

It is hoped that this publication would be of immense use to the Government offices, planners and research workers.

Dated 2-5-1984

DHANI RAM, I.A.S.,
Director of Land Records,
Himachal Pradesh, Shimla-2.

HIMACHAL AT A GLANCE

Year 1980-81

1. Area in square kms.	55,673 sqr. km.
2. Reporting area for Land-utilisation purposes.	29,852 sqr. km.
3. Total Cropped area	9,46,414 hectares.
4. Net Cropped area	5,72,165 hectares.
5. Gross irrigated area	1,55,868 "
6. Net irrigated area	91,818 "
7. Gross cropped area under four major crops viz. rice, wheat, barley and maize.	7,66,592 "
8. Total output for Food Crops	12.33 lacs metric tonnes.
9. Total output of non-food crops	0.89 lacs metric tonnes.
10. Total Population (1981 Census)	42,80,818
11. Decennial Population growth	+23.71
12. Density of population per sq. km. 1981	77
13. Sex ratio (Number of females per 1000 males).	973
14. Literacy percentage	42.48
15. Number of villages (Inhabited and uninhabited).	18,721
16. Total livestock population 1982 (including dogs).	51.24 lakhs.

ANNUAL SEASON AND CROP REPORT—1980-81

Annual Season and Crop Report 1980-81 is an annual publication of the State, delineating therein the district-wise important agricultural statistics viz., land-use classification, month-wise rainfall data, source-wise and crop-wise irrigated area, detailed break-up of cropping pattern and production, followed by a brief survey on prevailing farm-harvest prices and agricultural wages. The report commences with summary tables of the aforesaid statistics for the preceding four years, with the current year i.e. 1980-81 as the fifth year. The report presents all the statistical data in metric units i.e. area in hectares and production in metric tonnes.

Seasonal Conditions:

The average annual rainfall received during the year 1980-81 in Himachal Pradesh was 892.4 MM as against the 1412.8 mm average normal rainfall. This rainfall is 34.8 % below than the normal rainfall. The highest average rainfall 1277.7 mm was recorded in Mandi District. This rainfall is also 9.61 less than the average normal rainfall. In area of Lahaul and Spiti District average rainfall was recorded 410.7 mm. The average rainfall in Hamirpur District for Monsoon season and past Monsoon was recorded 326.0 mm. The rainfall for the first two seasons could not be recorded due to non-working condition of the raingauge. The rainfall data of Kullu District is not available as raingauge has yet to be installed there at. In the remaining districts rainfall was recorded below the average normal rainfall. They are according to the seasonal conditions was not so satisfactory but it was comparatively better than the previous year. The drought condition prevailed for a long spell and inadequate receipt of water in minor irrigation sources. There was scarcity of drinking water during premonsoon season and past Monsoon season. According to the crop season the season is divided into four major seasons. The detail-wise and season-wise description is as under.

I. Winter Season:

This season is from 1st January to 28th February. During this season 122.8 mm of average rainfall was recorded in the State as against 166.3 MM of normal rainfall. This rainfall is 26.11 mm deficit. The highest average rainfall in this season was recorded in Kinnaur District, the lowest average rainfall was recorded in Sirmaur District 48.3 mm. While 48.8 mm average rainfall was recorded in Solan District. There was a dry spell for long time in Solan, Sirmaur, Bilaspur and Mandi Districts. There was drought condition in the month of January but condition improved in the month of February. There was shortage of water in the winter season.

Premonsoon:

This season is from 1st March to 31st May. In this season 98.5 mm of average rainfall was recorded in the State as against 168.1 MM of average normal rainfall there was 41.4 % deficit in the rainfall in this season though there was deficit in rainfall even then crop condition was satisfactory. In the month of March the crop condition was satisfactory due to regular rains at the time of the crop growth. The crop condition

was also satisfactory in the month of April. At the time of harvesting, the sky was mostly clear. As a whole premonsoon season was favourable.

Monsoon Season:

Monsoon season was from 1st June to 30th September. 511.9 mm average rainfall was recorded in the state as against the 924.0 mm average normal rainfall. There was 38.2% deficit rainfall in this season. The highest rainfall in this season was recorded 983.7 mm average rainfall in Mandi District. The second district in which highest average was recorded was Sirmaur District, where 937.2 mm average rainfall was recorded. The lowest average rainfall was recorded 47.0 mm in Lahaul-Spiti District. In the month of June 121.8 mm average rainfall was recorded in the State, the lowest rainfall of 54.0 mm was recorded in the Una District but Kharif crop was sown in the first week of July in Una District. Rains were sufficient for the sowing of Kharif crop in the state. 265.0 mm of average rainfall was recorded in the month of July which was sufficient for the growth of crop. In the month of August 128.7 mm of average rainfall was recorded in the State. There was a dry spell for some period in the State which was harmful for the growth of the Kharif crop. The poorest position of the crop became in the month of September, in this month only 54.4 mm of average rainfall was recorded in the State. The Kharif crop condition was satisfactory in this season.

Post Monsoon:

Post Monsoon season from 1st October to 31st December. During this season 99.2 mm of average rainfall was recorded in the state against 153.6 mm average normal rainfall. There was 35% deficit in the rainfall. The highest rainfall 251.4 mm of average rainfall was recorded in Kangra District. The lowest rainfall was recorded in Lahaul and Spiti District 19.5 mm of average rainfall. There was dry spells in the State and inadequate receipt of water in minor irrigation sources.

Classification of Area-Land utilisation:

The total geographical area, according to the Surveyor General of India, is 55,67,300 hectares i.e. 55673 sq. km. In comparison to the geographical area, the total cadastrally surveyed area in the state during the year under review is 29,85,234 hectares, the deficit area being unsurveyed area which has hitherto not been subjected to precise measurement and hence does not appear on revenue records. The magnitude of such unsurveyed area in 1980-81 is 25,82,066 hectares and this constitutes 46 percent of the total geographical area. Although *ad hoc* estimates of such areas are available yet, in actuality, this difference would fall down as and when the settlement operations are extended to such areas with the consequent appearance of these areas on patwaris records.

The reporting area or cadastrally surveyed area is the summation of nine-fold land-use, and the percentages in table No. 1 have been computed on the basis of total reporting area.

Table 1: Classification of Reporting Area for the years 1979-80 and 1980-81 (In '000 hectares)

Sl. No.	Category	1980-81		1979-80	
		Area in Hectares	Percentage to total Reporting Area	Area in Hectares	Percentage to total area
1	2	3	4	5	6
1.	Forests	807	27	836	27
2.	Barren and unculturable land.	141	5	155	5
3.	Land put to non-Agricultural uses.	162	5	188	7
4.	Culturable waste	224	8	124	5
5.	Permanent pastures and other grazing land.	985	33	1020	38
6.	Misc. tree crops and groves not included in net area sown.	39	1	41	1
7.	Current Fallow	41	1	44	2
8.	Other Fallow lands	12	1	4	—
9.	Net area sown	572	19	572	19
10.	Total Reporting area	2985	100	2986	100
11.	Gross area sown	946	32	942	32
12.	Area sown more than once	374	12	370	12

The comments on nine-fold classification, along with their definitions, are as follows:—

Forests:

This denotes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state-owned or private, and whether wooded or maintained as potential forest land. The area under this category during the year under review has dropped by 1662 hectares as compared to the corresponding period of the last year which is attributable to some other category.

Barren and Unculturable Land:

This includes all barren and unculturable land like mountains, deserts, etc. Land which cannot be brought under cultivation except at an exorbitant cost should be classed as unculturable whether such land is in isolated blocks or within cultivated holdings. The decline of area under this category, as compared to the preceding year, is hardly 1 per cent and calls for no comments.

Land put to non-agricultural uses:

This includes all lands occupied by buildings, roads and railway or under water e.g. rivers and canals and other lands put to uses other than agricultural. The decline under this category, compared to the last, is 14 per cent and seems to be on account of conceptual difficulties in the field which henceforth are expected to be sorted out.

Culturable Waste:

This comprises all lands available for cultivation, whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for one reason or the other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may be assessed or unassessed and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for five years in succession should be included under this head.

The area under this category has nearly doubled as compared to the last year but increase or decrease of area under this category is usually of fluctuating nature.

Permanent pastures and other grazing lands:

This includes all grazing lands, whether they are permanent pastures and meadows or not. Village common grazing land is always included under this head. The decline of area under this category during the year 1980-81 as compared to the last year is 3 per cent and is attributable to the grant of nautor from under this category.

Land under Miscellaneous Tree Crops and Groves not included in net area sown:

This denotes all cultivable land which is not included in net area sown but is put to some agricultural uses. Lands under casurina trees, thatching grasses, bamboo bushes and other groves for fuel, etc. which are not included under (Orchards) are classed under this category.

The decline of area under this category is very nominal and calls for no comments.

Current Fallows:

This represents cropped area which are kept fallow during the current year. The variation under this category is often on account of rotation of crops and does not need any explanation.

Fallow Land other than Current Fallows:

This includes all lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year but not more than five years. The reasons for keeping such lands fallow may

(iii) siting of canals and rivers, and (iv) unremunerative nature of farming. The area under the category i.e. 12,612 hectares is treble of area under the preceding year. Such land is often reclaimable on accrual of agricultural facilities, and variation, therefore, calls for no comments.

Net area sown:

This represents the total area sown with crops and orchards, counting 'area sown more than once' in the same year only once. The area under this category during the year 1980-81 constitutes 19 per cent of the total reporting area and is almost stationary as compared to the last year.

Area sown more than once:

This represents the areas on which crops are cultivated more than once during the agricultural year. This is obtained by deducting the 'Net Area Sown' from 'Total Cropped Area'. The area under this category too, as compared to the last year, has hardly undergone any change and thus needs no explanation. In absolute terms, it is 3,74,249 hectares during 1980-81 and constitutes 65.4 per cent of the net area sown.

Total Cropped Area:

This represents the total area covered with crops, i.e. the sum total of areas covered by all the individual crops, areas sown with crops more than once during the year being counted as separate areas for each crop. As compared to the last year, the land under this category has shown a 0.3 per cent increase which hardly needs any comments. In absolute terms, it is 9.46 lakhs hectares and constitutes 32 per cent of the 'Total Area'.

Intensity of Cropping:

The agro-climatic conditions, mountainous tracks and pattern of land holdings being peculiar in the State, extensive cultivation is neither possible nor practicable. For increased out-put and better utilization of the cultivable land, it will be desirable if intensive methods of cropping are introduced. The intensity of cropping is given in table-2.

Table-2:—Intensity of Cropping in each district

Sl. No.	Name of District 2	Net area sown 3	Total cropped area 4	Intensity of cropping 5
1	2	3	4	5
1.	Bilaspur	31,549	59,595	188.9
2.	Chamba	40,952	64,117	156.6
3.	Hamirpur	39,211	71,566	182.5
4.	Kangra	1,20,286	1,93,227	160.7
5.	Kinnar	8,366	10,405	124.4
6.	Kullu	34,278	52,127	152.1
7.	Lahaul & Spiti	3,007	3,144	104.6

1	2	3	4	5
8.	Mandi	89,756	1,59,214	177.4
9.	Shimla	71,990	1,08,414	150.6
10.	Sirmaur	44,180	81,328	184.1
11.	Solan	45,397	71,861	158.3
12.	Una	43,193	71,416	165.3
H. P. State		5,72,165	9,46,414	165.4

$$\text{Intensity of Cropping} = \frac{\text{Total Cropped Area}}{\text{Net Area Sown}} \times 100$$

Intensity of cropping for the State for the year under review is 165.4 per cent but it varies for the component districts i. e. Lahaul-Spiti with 104.6 per cent followed in ascending order by Kinnaur, Shimla, Kullu and Chamba.. For Bilaspur district it is highest, being 188.9 per cent. The intensity of cropping in hilly district is low as compared to plain areas and lower hills. In hilly areas the crops wheat and potato are grown only once and thus the land remains fallow for one season. This is the reason for variation of intensity of cropping between different districts of the Pradesh.

The Table-3 shows district-wise percentage distribution of two important categories of land use viz. 'Net area sown' and 'area under Forests'. It also shows the area under these categories in each district to the reporting area in the district.

Table 3: Percentage distribution of net area sown and area under forests by district—1979-80 and 1980-81

Sl. No.	District	Percentage of net area sown in the District to the				Percentage of forest area in the District to the			
		Reporting area of the district		Total net area sown in the State		Reporting area of the District		Total Forest area in the State	
		1980-81 3	1979-80 4	1980-81 5	1979-80 6	1980-81 7	1979-80 8	1980-81 9	1979-80 10
1. Bilaspur	27.3	27.2	5.5	5.5	9.9	10.2	1.4	1.4	
2. Chamba	5.9	5.9	7.1	7.1	36.4	36.4	31.3	30.1	
3. Hamirpur	35.7	38.0	6.8	7.2	12.8	12.8	1.7	1.7	
4. Kangra	21.24	21.4	21.0	20.9	33.6	44.5	23.3	29.8	
5. Kinnaur	43.7	44.0	1.5	1.5	0.4	0.4	0.0	0.0	
6. Kullu	70.2	67.6	6.0	5.7	0.03	0.0	0.0	0.0	
7. Lahaul and Spiti	1.5	1.5	0.5	0.5	22.3	6.3	5.4	1.5	
8. Mandi	22.6	23.5	15.7	16.4	37.8	37.1	18.6	17.6	
9. Shimla	25.0	24.8	12.6	12.4	17.0	16.9	6.0	5.8	
10. Sirmaur	19.6	19.5	7.7	7.7	22.1	21.4	6.2	5.7	
11. Solan	25.2	23.9	7.9	7.5	10.9	10.9	2.4	2.3	
12. Una	28.0	27.4	7.5	7.4	18.4	20.6	3.5	3.8	
H. P. State	19.2	19.2	100.0	100.0	27.0	28.0	100.0	100.0	

Area irrigated by different sources—Table III-A:

The net area irrigated during 1980-81 increased by 1.4 per cent i.e. 91,818 hectares from 90,574 hectares in 1979-80. The variation in 'Net irrigated area' is attributable to occasional defects in the 'KUHLS' which constitute the major source of irrigation in the Pradesh. Ninety-five per cent of the total irrigated area is covered by kuhls which are small water channels that convey the water from the nearby rivers or khuds to the fields, and these are fed by making small notches on the river-banks. Because of the undulating and hilly terrain, the scope for lift irrigation and tube-wells is severely limited and such facilities are available in the low-lying areas only. The Table-4 gives the source-wise break-up of the net irrigated area during 1980-81 as compared to the preceding year 1979-80.

Table 4: Percentage share of irrigated area by source

Sl. No.	Source	Percentage to the total net area irrigated	
		1979-80 3	1980-81 4
1.	Canals	1.2	1.6
2.	Tanks	0.3	0.4
3.	Wells and Tube-wells	3.8	2.6
4.	Other sources (Kuhls)	94.7	95.4
	Total	100.0	100.0

The percentage share of area irrigated under important crops to the total area irrigated in the state and the percentage of area irrigated to the total area under the crops are as follows:—

Table III-B

Table 5: Area irrigated under principal crops 1980-81

Sl. No.	Crop	Percentage of area irrigated to the total irrigated area in the State	Percentage of area irrigated to the total area under the crops		
				3	4
1.	Rice	32.4	54.1		
2.	Wheat	36.4	16.2		
3.	Barley	3.5	15.2		
4.	Maize	11.2	6.1		
5.	Ragi and other millets	1.1	4.7		
6.	Sugarcane	0.4	18.6		
7.	Potatoes	1.9	17.7		
8.	Ginger	0.6	47.4		
9.	Other Food Crops	6.1	10.6		
10.	Total Food Crops	93.6	16.0		
11.	Total Non-Food Crops	6.4	29.2		
	Total Food & Non-Food Crops	100.0	16.5		

(x)

As will be evident from the table 5, wheat occupies the first place in terms of irrigated area followed by rice, maize and barley and these four crops together account for 83.5 per cent of the total irrigated area in the state. The total irrigated area, in terms of percentage to the total cropped area, comes to 16.5 per cent while in terms of net area sown it comes to 16 per cent showing thereby the predominant dependence of crops on rains which are often erratic and not well spread.

Cropping Pattern—IV A & B.

In terms of area hectarage, wheat occupies the first place followed by maize, rice and barley. The gross cropped area during 1980-81 was 9.46 lakh hectares compared to the 9.43 lakh hectares during 1979-80, thus recording a marginal increase of 0.3 per cent. Because of the typical geographical location of the State, the crop for varied cropping pattern is severely limited, though off-season vegetable crops are raised on a small scale.

The table-6 shows the area under different crops and its percentage to the total cropped area during 1980-81 and 1979-80.

Table 6: Area under crops 1979-80 and 1980-81

Sl. No.	Crop	1980-81		1979-80	
		Area in thousand hectares	Percentage share to the total cropped area	Area in thousand hectares	Percentage share to the total cropped area
1	2	3	4	5	6
1.	Rice	93.3	9.8	92.8	9.8
2.	Wheat	350.8	37.0	347.7	36.9
3.	Barley	36.6	3.9	35.5	3.8
4.	Maize	285.9	30.2	281.3	29.8
5.	Ragi	12.0	1.3	13.4	1.4
6.	Common and little millets	22.5	2.4	23.3	2.5
7.	Total cereals	801.0	84.6	794.8	84.3
8.	Gram	16.1	1.7	19.7	2.1
9.	Black gram	23.5	2.5	23.9	2.5
10.	Horse gram	7.6	0.8	8.3	0.9
11.	Masur	2.1	0.2	1.9	0.2
12.	Other Pulses	6.3	1.4	10.6	1.1
	Total Pulses	55.6	5.9	64.4	6.8
	Total Foodgrains	856.6	90.5	859.1	91.1
13.	Sugarcane	3.1	0.3	3.1	0.3
14.	Apples	20.3	2.1	19.9	2.1
15.	Potatoes	16.7	1.8	15.5	1.6
16.	Fruits and Vegetables (except Apples and Potatoes)	11.9	1.2	10.1	1.1
17.	Chillies	0.9	0.1	0.9	0.0
18.	Ginger	2.0	0.2	2.5	0.2

(xi)

19.	Other Food crops	0.7	0.0	0.8	0.0
	Total Food crops	912.2	96.4	911.9	96.7
20.	Cotton	1.1	0.1	0.5	0.0
21.	Groundnut	1.3	0.1	1.4	0.1
22.	Sesamum	8.0	0.8	6.4	0.7
23.	Rape-Mustard	7.1	0.7	5.4	0.6
24.	Linseed	5.1	0.5	5.8	0.6
25.	Tea	3.3	0.3	3.3	0.3
26.	Fodder Crops	6.6	0.7	6.6	0.7
27.	Other Non-food crops	1.7	0.2	1.6	0.2
28.	Total non-food crops	34.2	3.6	31.0	3.3
29.	Total cropped Area	946.4	100.0	942.9	100.0

It reveals that of the 9.46 lakh hectares of the total cropped area, 90.5 per cent was sown under total foodgrains out of which the four major crops viz. rice, wheat, barley and maize together alone accounted for 80.9 per cent. The total food crops accounted for 96.4 per cent, thus leaving a slender percentage of 3.6 per cent for non-food crops.

Yield per hectare—Table V-A:

The table-7 delineates the yield per hectare in respect of four major crops of the state for the year 1980-81 juxtaposed with the preceding year 1979-80. The yield in respect of these crops is determined on the basis of crop-cutting experiments by random-sampling method with the Kanungo-circle as the lowest stratum. The conduct of aforesaid experiments is under the charge of Agricultural Statistical Officer, Directorate of Agriculture, Himachal Pradesh while execution of the field work is done by the Revenue agency.

Table 7: Average yield per hectare of important crops

Sl. No.	Name of the crop	Yield per hectare in kg.	
		1979-80 3	1980-81 4
1.	Wheat	783	1265
2.	Rice	877	1122
3.	Maize	1595	1812
4.	Barley	897	1418

The sudden rise in the yield per hectare is attributable to the agricultural year 1980-81 being normal in comparison to the preceding year 1979-80 which was drought-ravaged.

Production—Table-V B:

Because of the weather conditions returning to normalcy during the year under review, the state production of foodgrains rose to 11.57 lakh tonnes in comparison to the year 1979-80, when the wide-spread damage due to drought hauled down the production to a mere 8.83 lakh tonnes only.

Of the total production of foodgrains i. e. 11.57 lakh tonnes during 1980-81, the four major crops alone viz. rice, wheat, barley and maize contributed 96.5 per cent, the rest was due to other minor crops grown in the State. The two major kharif crops i.e. rice & maize contributed 6.22 lakh tonnes (53.7) per cent and the two major rabi crops of wheat and barley accounted for 4.95 lakh tonnes of foodgrains i. e. 42.8 per cent.

The yield per hectare and production of all crops other than the four principal crops is determined by traditional method, which in the revenue jargon, is designated as Annawari estimate. This methodology is based on the 'Normal yield' the condition factor and the 'Current yield'. The normal yield is characteristic of produce of a normal year under normal agricultural conditions and is generally determined as a 5-yearly moving average while the 'condition factor' denotes the condition of the current year crops with reference to the 'Normal yield' and thus helps in determining the 'Current yield'. The production of four major crops is tabulated in Table-8.

Table-8: Production

Sl. No.	Crop	Total production (In lakh metric tonnes)	
		1979-80 1	1980-81 3
1.	Maize	4.49	5.18
2.	Wheat	2.73	4.43
3.	Rice	0.80	1.04
4.	Barley	0.33	0.52

The production under broad categories is as hereunder:

Sl. No.	Crop	Total production (In lakh metric tonnes)	
		1979-80 1	1980-81 3
1.	Total cereals (including four major crops).	8.58	11.39
2.	Total Pulses	0.24	0.18
3.	Total Foodgrains	8.82	11.57
4.	Total condiments and spices.	0.03	0.04
5.	Sugarcane (In gur)	0.08	0.04
6.	Potatoes	0.63	0.55
7.	Total Food crops	9.56	12.19
8.	Total non-food crops	0.08	0.08

Farm Harvest Prices—Table-VI:

The Table-9 gives a comparative statement of farm harvest prices for the year 1980-81 vis-a-vis 1979-80.

Table-9: Farm Harvest Prices

Sl. No.	Crop	Price of the crop at the farm site per quintal	
		1979-80 1 2	1980-81 3 4
1. Rice	187.63	171.79	
2. Wheat	149.19	151.90	
3. Barley	130.73	147.05	
4. Maize	124.34	128.90	
5. Gram	282.49	384.23	
6. Sugarcane (Raw)	250.62	319.67	
7. Groundnut	353.08	408.75	
8. Rape	399.12	459.95	
9. Mustard	414.39	454.97	
10. Tobacco	322.91	346.85	

The rise in prices during 1980-81 is in keeping with the rise in cost of cultivation caused by rise in incidental inputs.

Agricultural wages—Table-VII:

The Table-10 compares the prevailing wages of skilled and unskilled labour as have been observed during various district centres in the State.

Table 10: Agricultural wages

Sl. No.	Category of labour	Daily Wages (In Rupees)	
		1979-80 1 2	1980-81 3 4
1. Carpenters	14.67	15.62	
2. Blacksmiths	13.17	14.91	
3. Cobblers	12.20	12.81	
4. Field Labour	8.01	8.54	
5. Other Agricultural Labour	7.35	7.64	
6. Herdsmen	6.97	6.55	

State Livestock—Table-VIII:

The Table-11 gives the comparative results of 11th and 12th States Livestock Census held in 1972 and 1977 respectively.

Sl. No.	Classification	Livestock (In lakhs)		
		1972 1	1977 2	Percentage Difference 5
1. Total cattle	20.97	21.06	+0.4	
2. Buffaloes	5.44	5.60	+3	
3. Sheep	10.39	10.55	+1	
4. Goats	9.06	10.35	+14	
5. Horses and Ponies	0.16	0.15	-8	
6. Others (Camels, yaks, mules etc.)	0.22	0.24	+9	
7. Total Livestock	46.24	47.95	+3.7	

District-wise villages:

The District-wise break-up of inhabited and uninhabited villages, as per 1981-Census, is tabulated below:—

Sl. No.	District	Number of villages		
		Inhabited 1 3	Un-inhabited 2 4	Total 5
1. Bilaspur	942	74	1016	
2. Chamba	1098	482	1580	
3. Hamirpur	1621	31	1652	
4. Kangra	3753	319	4072	
5. Kinnaur	77	—	77	
6. Kullu	169	—	169	
7. Lahaul-Spiti	239	98	337	
8. Mandi	2806	540	3346	
9. Shimla	2225	184	2409	
10. Sirmaur	967	1	968	
11. Solan	2358	143	2501	
12. Una	552	42	594	
Total	16,807	1,914	18,721	

In Retrospect:

As the report unfolds itself, it will be seen that agricultural economy has shown a sudden recovery during the year 1980-81, following the deplation of the effects of drought during 1979-80. The total output of food crops during 1980-81 rose to 12.33 lakh metric tonnes from 9.93 lakh metric tonnes during the preceding year 1979-80. This upward rise is equally evident in respect of non-food crops which rose from 0.8 lakh tonnes during the year 1979-80 to 0.9 lakh tonnes in 1980-81. The year under review remained, by and large, a normal year.

SUMMARY TABLES

A—Classification of Area
