

EXPLANATORY NOTE ON THE SEASON AND CROP REPORT OF  
HIMACHAL PRADESH ADMINISTRATION FOR THE YEAR 1958-59

I—INTRODUCTION

The report under reference relates to the year 1958-59. Every item of the summary tables has been explained and discussed in the corresponding detailed tables. The agricultural year under review was reported below normal in all the Districts except in Chamba due to untimely and unevenly distributed rains and the vagaries of nature. The yield has been reported less due to scarcity of rains at the time of maturing. Hail-storms etc. also damaged the crops. Though there was a slight increase in the total cropped area, yet the total outturn of foodgrains was less than the yield of the previous year.

II—GEOGRAPHICAL AREA

This Territory is comprised of 5 Districts having 24 Tehsils and 5 Sub-Tehsils. Total geographical area according to the Surveyor General of India is 69,90,080 acres i.e. 10,922 square miles. According to the village papers the area stood 38,82,123 acres which is 56 per cent of the total geographical area.

The area, which does not find entry in the Revenue Records comes mostly under Forests, a part of which is being directly reported by the Forest Department. It also includes barren and unculturable waste, permanent pastures and other grazing lands a major portion of which has not been surveyed cadastrally so far.

There is a slight increase in area by village papers as compared to the last year. This has been reported in Mahasu and Mandi districts. The increase being nominal calls for no remarks.

III—VILLAGE

Total number of villages in the Territory is 10,893. District-wise list is as under:—

1. Bilaspur .. .. .	1,025
2. Chamba .. .. .	1,696
3. Mahasu .. .. .	3,254
4. Mandi .. .. .	3,946
5. Sirmaur .. .. .	972
TOTAL .. .. .	10,893

IV—EXTENT OF REPORTING AND NON-REPORTING AREA

Total area .. .. .	69,90,080
Reporting area .. .. .	38,82,123
Non-reporting area .. .. .	31,07,957

V—RAINFALL

Table No. I illustrates the spread of rainfall district-wise during the different seasons.

Season-wise account of rainfall is as under:—

(a) *Premonsoon*.—The rains were reported normal in Mandi and Chamba while in other Districts the rainfall was insufficient and untimely. The shortage of rains at the time of maturing of *rabi* crops affected the outturn of the crops to some extent.

(b) *Monsoon*.—The average rainfall for the season is given below district-wise:—

1. Bilaspur .. .. .	964.4
2. Chamba .. .. .	1035.4
3. Mahasu .. .. .	735.5
4. Mandi .. .. .	1255.5
5. Sirmur .. .. .	1638.0

The rains were reported more in Bilaspur, Mahasu and Chamba and in other Districts these were reported normal. In Chamba district the rains were evenly distributed.

(c) *Post-Monsoon*.—The rains were normal in Chamba and Mandi while less in Bilaspur and Mahasu districts. In Sirmur the rainfall was adequate but untimely.

(d) *Winter*.—The rains during the season were normal in Bilaspur, Chamba and Mandi while in other Districts rainfall was insufficient which damaged the *rabi* crops to some extent.

#### NO. OF RAINY DAYS

Rain fell for 71.7 days during the year. The following detail will show the spread of rainfall:—

Name of Season	1957-58	1958-59
1. Premonsoon .. .. .	17 days	11.2 days
2. Monsoon .. .. .	42 days	45.9 days
3. Post-monsoon .. .. .	10 days	7.7 days
4. Winter .. .. .	11 days	6.9 days
TOTAL .. .. .	80 days	71.7 days

The rains were reported sufficient and were more or less evenly distributed in Chamba and Mandi districts. In other districts the rains were not sufficient and some damage was also caused to the crops due to draught. The yield was, therefore, below normal.

#### VI—CLASSIFICATION OF AREA

Table No. II illustrates the utilization of land during the year.

Out of the total reporting area 34% constitutes forests, 2% barren and unculturable land, 3% land put to non-agricultural use, 3% culturable waste, 38% permanent pastures and other grazing lands, 2% land under tree crops and groves, 1% fallow land and 17% net area sown. The difference in figures as compared to the figures of last year under the various heads during the year under report is nominal and this is due to correct classification now.

#### VII—SOURCES OF WATER SUPPLY AND AREA AND CROPS IRRIGATED THEREFROM

The sources of water supply for irrigation purposes are generally inadequate. Private owned *Kuhls* i.e., small water channels drawn from the springs and streams are the only sources of irrigation throughout the Territory except two canals recently constructed in Sirmur district by the Irrigation Department Himachal Pradesh P.W.D. The Irrigation Department and Extension Services Blocks (Development) are however contributing for the construction of *Kuhls* with the co-operation of public where the sources of water are available. So far no appreciable increase in this kind of irrigated area is visible as *Kuhls* are still incomplete. Some improvement is expected as soon as the construction of the *Kuhls* undertaken by them is completed. The area irrigated by *Kuhls* and the canals during the year under report was 14% of the net area sown. There is a slight increase in the net irrigated area as compared to last year.

#### VIII—CROP ACREAGE

Total cropped area was 10,74,316 acres during the year as compared to 10,63,437 acres last year. Net area sown comes to 6,67,379 acres as compared to 6,68,549 acres during the

preceding year. Area sown more than once was 4,06,937 acres during the year as against 3,94,888 acres last year. The increase in total cropped area and area sown more than once and decrease in net area sown is nominal and calls for no remarks.

#### IX—YIELD PER ACRE OF CROPS

Table No. V-A. illustrates the average yield of principal crops per acre. Generally the yield has shown some decrease which is due to the adverse seasonal conditions at the time of maturing and harvesting. Hail-storms also affected the yield to some extent while insufficient rains too played a part in this regard. Though the Zamindars adopted improved methods of cultivation and artificial fertilizer yet the adverse season affected the yield and better results did not come out.

The average yield obtained through crop cutting experiments by random sampling method in respect of rice and wheat have been utilized in working out the outturn of crops concerned. The yield of other crops was, however, obtained through old methods.

#### X—TOTAL OUTTURN OF CROPS

The following details will show the total outturn of food and non-food crops:—

Name of crops	1957-58	1958-59
1. Food crops .. .. .	2,82,260 tons	2,72,613 tons
2. Non-food crops .. .. .	1,828 tons	1,662 tons
TOTAL .. .. .	2,84,088 tons	2,74,275 tons

#### XI—FARM HARVEST PRICES

There was a slight increase in the farm harvest prices of principal crops which was due to the increase of prices of other necessities of life and less yield of food crops. The average of farm harvest prices has been calculated on weighted averages for the Territory.

#### XII—AGRICULTURAL WAGES

The majority of peasants in this Territory generally work on mutual co-operation basis and hardly employ any labour. Some labour is engaged by the peasants at the time of harvesting and sowing of crops only. Normal working hours are eight.

There was slight increase in the wages of skilled and unskilled labourers in some districts, this year as against the previous year which was due to general rise in the prices of foodgrains. Also the people are engaged by various Departments such as P.W.D., Forests, Development etc., for the construction of various roads and development work where they are paid higher. That affected the peasantry circle too. Generally the skilled labourers are paid on monthly basis.

#### XIII—NUMBER OF LIVE STOCK ETC.

The figures shown in Table No. VIII of the report are according to cattle census held in 1956. During the year under review as many as 92,708 cattle including sheep and goats were affected by various diseases as against 97,046 cattle during the corresponding period of last year. The main disease that occurred was foot and mouth in all the Districts. Out of the number of cattle affected by the diseases 997 died as compared to 307 last year. The total number of cattle cured and treated during the year comes to 2,58,585 as against 2,31,087 in the preceding year. The increase in the number of cattle treated and cured as compared to the number of affected was due to the fact that other cattle who were not affected were also treated to further check infection of the diseases. The Veterinary Department provided necessary medical aid to the ailing animals. Infestants, tetmosol dressing, sub-cut injections and serum and vaccine injections were applied to the animals.

The number of animals castrated during the year under report was 92,017 as against 22,464 during the last year.

For the improvement of cattle and grading thereof pedigree bull cows and buffalo bulls are kept at each Veterinary Hospital and Village Key Centres. Buffalo bulls of improved breeds have also been distributed amongst the Gujjars in the Territory. Some Hissar dals, Polworth, Corridale and Rampurrams were distributed in the upper regions of the Pradesh, such as Chini, Pangi and Bharmour Tehsils.

Key Village Centres under the Key Village Scheme sponsored by the Government of India are working in the Pradesh at various places.

Veterinary Hospital and Dispensaries are running in all the Districts of the Territory, at important places.

#### XIV—GENERAL

The general condition of the Agriculturists has improved as a result of implementation of the Development Plans in the Territory. Still more is required to be done towards the improvement of the condition of the agriculturists in respect of teaching them the latest methods of cultivation, use of artificial-manure and the agriculture implements.

The holdings in the Pradesh are also too small. The pressure of population is increasing. The distribution of artificial and improved varieties of seeds have pushed forward the grow-more-food campaign to some extent. The Zamindars are given Taccavi Loans for increasing areas under horticulture and also for improving the existing cultivated lands. The Agriculture and Development Departments are granting loans to help the Agriculturists. Co-operative Societies and Panchayats are taking much interest for the general improvement and economic condition of the people. There is a solid hope of an around steady improvement in a steady way.

The general standard and health of cattle is still poor, in spite of the best efforts of the Animal Husbandry Department. This Department has brought innumerable breeds of animals and are placing vast amounts of medicine and effort to improve the condition of cattle but the last resource of the general health of the animal is in the hands of Zamindars i.e., feeding.

TULSI RAM CHANDEL,

*Director of Land Records,  
Himachal Pradesh.*

## SUMMARY TABLES—concl'd.

## H.—Number of Livestock, Poultry and Agricultural Machinery

	1951	1956
<b>Cattle:</b>		
Males over 3 years—		
Breeding bulls .. .. .	1,571	1,490
Other males over 3 years .. .. .	3,68,917	3,79,753
Females over 3 years—		
Breeding cows .. .. .	3,59,649	3,99,978
Other cows over 3 years .. .. .	10,399	1,754
Young stock .. .. .	3,74,905	3,87,786
Total Cattle .. .. .	11,15,441	11,70,761
<b>Buffaloes:</b>		
Males over 3 years—		
Breeding bulls .. .. .	2,449	3,710
Other males over 3 years .. .. .	753	937
Females over 3 years—		
Breeding cows .. .. .	1,18,712	1,41,818
Other cows over 3 years .. .. .	1,403	694
Young stock .. .. .	51,819	58,805
Total Buffaloes .. .. .	1,75,136	2,05,964
Total Sheep .. .. .	6,26,925	6,97,176
Total Goats .. .. .	5,71,697	6,51,623
<b>Horses and ponies:</b>		
Males over 3 years .. .. .	2,630	2,366
Females over 3 years .. .. .	1,613	1,955
Young stock .. .. .	945	1,199
Total Horses and Ponies .. .. .	5,188	5,520
Mules .. .. .	4,191	3,446
Donkeys .. .. .	2,493	2,378
Camels .. .. .	84	100
Pigs .. .. .	3,678	2,204
Total Livestock .. .. .	25,04,833	27,39,172
<b>Poultry:</b>		
Fowls .. .. .	35,727	55,651
Ducks .. .. .	21	37
Others .. .. .	..	8
Total Poultry .. .. .	35,748	55,696
<b>Agricultural Machinery and Implements:</b>		
Plough .. .. .	1,92,419	2,19,932
Carts .. .. .	1,154	1,318
Sugarcane crushers .. .. .	497	506
Tractors .. .. .	1	3
Oil Engines .. .. .	15	6
Electric Pumps .. .. .	1	2
Ghanis .. .. .	1,048	810

TABLE  
Classification of area in each District of

District	Total geographical area			Classi-	
	By Pro- fessional Survey	By Village Papers	Forests	Barren and uncul- turable land	Land put to non- agricul- tural uses
