

**1. Som Datt,
GPS Shoran
Kullu-I, Kullu**

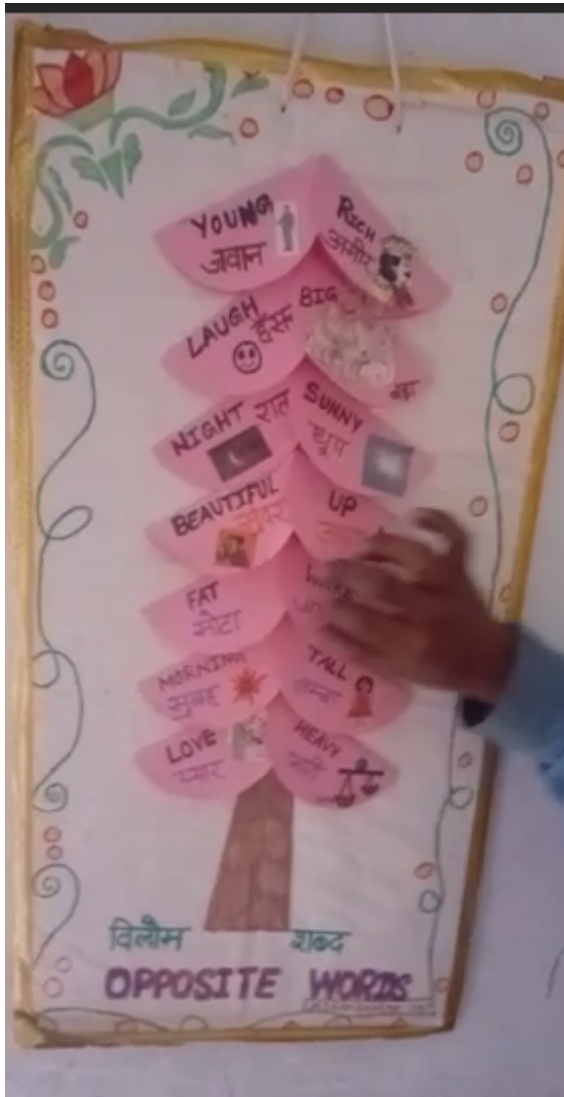

Mr. Som Datt teaches concepts with a practical approach. He conducts activities for teaching scientific concepts that helps connect students to everyday life. He also encourages students to perform activities themselves to understand by doing rather than theoretical knowledge.

2. Kiran Sharma
GPS Bhalwani
Balh, Mandi

Kiran Sharma actively teaches students through working model and charts. She involve students to enhance learning level of students through innovative teaching methods i.e.use of waste material to prepare model and story through puppets.She taught division in an easy to understand way using sticks and preparing a TLM which students used to grasp the concept of dividend, divisor and remainder.

She also focuses on teaching English through engaging stories and models and ensures participation of students.

3. Sarita Sharma
GPS Jukain
Gopalpur, Mandi

Ms. Sarita Sharma has developed her own TLMs to teach difficult to understand concepts. She is using an innovative method of teaching place value to the students . Students are taking keen interest in the activity and they are now able to describe place value of any number and also they are able to expand the numbers according to their place value. In this manner, all students are able to understand concepts like the place value properly and apply it. This is also reflected in the high proportion of students scoring high grades in their examinations.
