YOUR VALUABLE COMMENTS

On visited one of the leading trout fish seed production of HP Fishermen very well maintained with dedicated officers. It is serving as a centre for trout culture particularly in Himachal. The seeds are supplied across the country, then spreading the cold water fisheries in the country. Farmers friendly program under CSS- Blue Revolution should help in expanding cold water fisheries.

A national level endeavor to avoid in breeding in region. Probably recent generation of trout breeders seeds have to be imported from HP, J&K, Sikkim etc.
